

Etac Molift Partner 255

The flagship of Etac Molift's mobile lifters.

Find optional suspensions and detailed information at page 26–27.

Vertical lifting pattern and excellent range

Etac Molift Partner 255 provides an ideal solution for lifting with high complexity situations in acute and critical care areas in both hospitals and care facilities. With an excellent lifting range: 37 – 179 cm (14.5" – 70.4") the Molift Partner 255 allows easy lifting from the floor as well as high surfaces.

The straight vertical column in combination with the fixed suspension provides excellent stability and maintains the user at a good distance from the column.

Stability, maneuverability and lifting capacity

With a total weight of 42.5 kg (94 lbs) Molift Partner 255 is one of the lightest in its category, and combined with excellent construction design and wheel solution, it becomes very easy to maneuver with a safe working load of 255 kg (562 lbs). Equipped with environmentally friendly NiMH-battery.

Features

High safe working load
Molift Partner 255 has a safe working load of 255 kg (562 lbs)

Low base
Molift Partner 255 is also available with an extra low base chassis. A base height of only 6 cm (2.4") is one of the lowest in the market.

Walking arms
Molift Partner 255 is available with additional Support Arms. This in combination with the maximum height provides an ideal solution for walking training.

4-point suspension
Ensures a comfortable and spacious lifting position. Combined with the vertical lifting pattern it creates a safe and stable transfer.

Accessories

Weight Scale Arm – Molift Partner 255
1331002
The Molift Partner 255 scale is placed on top of the lifting arm, thereby subtracting nothing from the lifting height. The scale is approved Class III and can also calculate BMI (Body Mass Index).

Etac Molift Partner 255 has a vertical lifting pattern which keeps the user at an equidistant length from the column during the entire lift, creating a safe and stable position.
