Through-floor Lift

with Traction Drive System

Clean, environmentally friendly and requiring 30% less power to run, the traction drive through-floor lift from Pollock Lifts delivers on every level.

Pollock Eco Lift with Traction Drive System

The Eco Lift uses an electric motor and pulleys to transport the through floor lift between floors in a domestic setting. It has significant features and benefits on a typical hydraulic drive system using a hydraulic pump and ram to move the lift.

The Benefits of Traction Drive

Clean and Environmentally friendly

Uses no hydraulic oil or systems.

Requires **30%** less power to run.

Includes soft start/soft stop facility as standard at **no extra cost.**

Quieter – it is 25% quieter than a hydraulic system.

Higher travel – up to 4.2mtrs v 3.6mtrs with hydraulic.

No hydraulics

- › No oil leaks
- › No creeping in cold weather

Exceptional Safety –

- › Tested to passenger lift standards

The traction drive system is run electronically. It is clean, environmentally friendly and requires 30% less power to run, helping to reduce our carbon footprint.

Standard Features

- › 750mm x 1100mm internal car size
- › Soft start/soft stop facility
- › Remote control call stations
- › In car light, mirror and controls
- › Generous vision panels
